

Package included

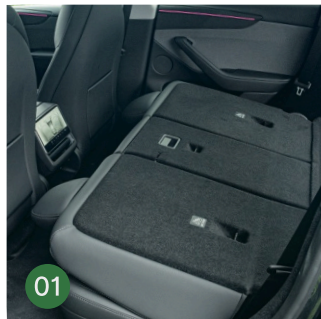

Mattress Pro

Storage Bag

Removable Sheet

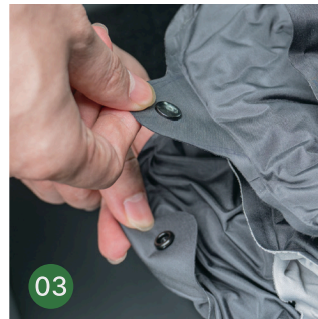

01

Move the front seats forward and fold down the rear seats completely.

02

Take the Model Y mattress out of the storage bag and place it on the rear seats.

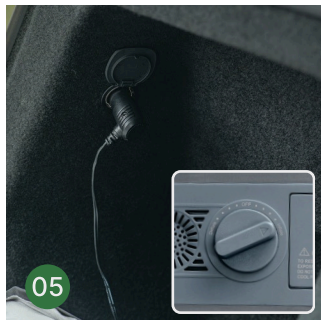

03

Unfasten the 3 securing buckles and unfold the model Y mattress Pro.

04

Lay the Model Y Mattress Pro flat in the trunk area.

05

Connect the built-in pump to the 12V socket and turn it on to inflate (Inflation takes about 50 sec).

06

Take out the fitted sheet and locate the "Top/Bottom" label indicating the correct orientation.

07

Tuck the sheet under the mattress and the seat and adjust the sheet on both sides.

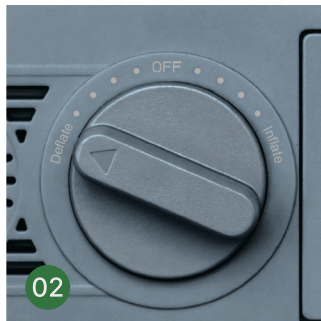

08

Enjoy Tesla camping! Your comfortable sleep setup is ready.

01 Remove the mattress cover from the model Y mattress Pro.

02 Plug in the power and turn the switch to Deflate (the compression process takes about 1 minute).

03 After deflating, unplug the power cord and store it in the storage box.

04 Fold the mattress in half.

05 Secure the 3 fixing buckles on the mattress to prevent it from unfolding.

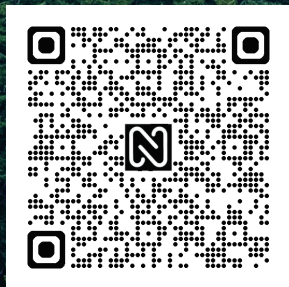

06 Roll up the mattress from the tail end.

07 Place the mattress into the storage bag—it can then be easily stored in the frunk or sub-trunk.

08 Your Model Y Mattress Pro is neatly packed and ready for your next adventure!
